Week Starting:	28/09/2026 TO 02/10/2026			
Meeting Details	**START TIME**		**END TIME**	
Student Name:	Yuliia Antonova			

Description of work completed since previous meeting Notes : Also record project backlog, use notes page as required
Developed a proof-of-concept for the digital plant project. Created a 3D leaf model in Blender and recorded a short demonstration video. Developed a Three.js prototype of a rotating digital plant with a stem and multiple leaves. Updated the project presentation and added technical development details. Organised the project repository on GitHub and uploaded the presentation, prototype code and Blender video.

Tasks to be completed this week **Notes: record any additional tasks on notes page as required.**	
1	Present the digital plant proof-of-concept to the supervisor.
2	Refine the 3D leaf model and improve its shape and geometry.
3	Continue developing the digital plant prototype in Three.js.
4	Add user interaction to the plant, such as clicking on the plant or leaves.
5	Research suitable techniques for procedural/generative plant growth and branching.
6	Document the development process, research and technical decisions in the project repository.
